# MEMS 8x8 Fiber Optical Switch 

 (Latching and Non-latching Series, SM, PM)(Protected by U.S. patent 8,203,775, 20170184840A1, and other patents pending)

## Features <br> - Reliable <br> - Compact <br> - No Drift <br> - Latching

Revised on 03/15/22 (Click here for latest revision)

## Product Description

The MEMS $8 \times 8$ Series Fiber Optic switch redirects incoming optical signals into 4 selected output fibers with blocking. This is achieved using a patented MEMS configuration and activated via an electrical control signal. It uniquely features highly reliable thermally activated micro-mirror, latches to preserve the selected optical path after the drive signal has been removed, and no drift over time. Light path is bidirectional and non-blocking. Is has a dual $8 \times 8$ and ad/drop optional configurations.

This novel design offers unprecedented long term high stability as well as fault-safe latching reliability. The switch is available in both device format and integrated with driving electronics.

## Performance Specifications

| MEMS 8x8 Switch | Min | Typical | Max | Unit |
| :---: | :---: | :---: | :---: | :---: |
| Operation Wavelength | Singe Band: 780, 850, 980, 1060, 1310, 1550 <br> Broad Band: 1260~1620 |  |  | nm |
|  |  |  |  |  |
| Insertion Loss [1], [2] |  | 1.7 | 2.2 | dB |
| Polarization Dependent Loss |  |  | 0.2 | dB |
| Extinction Ratio (PM) | 18 | 25 |  | dB |
| Return Loss [1], [2] | 50 |  |  | dB |
| Cross Talk ${ }^{[1],}$ [2] | 50 |  |  | dB |
| Wavelength Dependent Loss |  | 0.2 | 0.3 | dB |
| Response Time |  | 5 | 10 | ms |
| Repetition Rate |  | 5 |  | Hz |
| Repeatability |  |  | $\pm 0.05$ | dB |
| Durability | $10^{9}$ |  |  | Cycle |
| Operating Temperature ${ }^{[3]}$ | -5 |  | 70 | ${ }^{\circ} \mathrm{C}$ |
| Storage Temperature | -40 |  | 85 | ${ }^{\circ} \mathrm{C}$ |
| Optical Power Handling |  | 300 |  | mW |

1. IL could be 0.2 dB higher at the wavelength close to the edge of broad waveband.
2. Excluding connectors.
3. $-40^{\circ} \mathrm{C}$ Operating Temperature version is available.

## MEMS 8x8 Fiber Optical Switch

## (Latching and Non-latching Series, SM, PM)

## Mechanical Dimensions (Unit: mm)

TBD
*Product dimensions may change without notice. This is sometimes required for non-standard specifications.

## Control Interface Information

1. The control interface is Micro-USB with GUI and/or command list. RS232 can be an alternative option with the adaption cable of converter, but USB and RS232 can't be implement on same driver.
2. The electric power consumption in No-latching version is much more than Latching version.

## $10{ }^{9}$ Switching Cycle Test

We have tested MEMS $1 \times 2$ switch at the resonant frequency $\sim 300 \mathrm{~Hz}$ for more than 40 days, as shown in the attachment, which corresponding over $10{ }^{9}$ switching cycles. The measurements show little changes in Insertion loss, Cross Talk, Return loss etc, all parameters are within our specs.
