

## **UVA Light Intensity Meter**

- Measure UV intensity up to 4mW/cm<sup>2</sup> or 40mW/cm<sup>2</sup>
- Covering 290nm to 390nm, the UVA band
- Accepts multiple light guide/lens head sizes
- Battery-powered long-lasting
- Measure UV lamp to achieve repeatable curing process
- Meet ISO 9001 requirements, Calibration Service is available

This UV intensity meter is regularly reconfigured to measure low UV light intensity from 4 to 40mW/cm2 in the UV-AB bands. For higher power measurements or other UV bands, please see other versions.

When pressing the "green" button to turn ON the power, the display comes alive. If any digits appear with the cove is on, Press the "Zero" button so that only zero displays. Remove the cap and expose the sensor head to UV radiation; the intensity will appear on display. Press the "UNIT" button to switch from 0000 mW/cm<sup>2</sup> to 00.00 mW/cm<sup>2</sup> or back forth. When the "HOLD" switch is pressed, the measurement is frozen. The instrument has an LDC display back illumination light switch for viewing in a dim environment. Press 🔯 button, and the backlight light on, which turns off after 30 seconds to save battery power. Press the "green" button once again to turn OFF the power and put the device goes into sleep mode.
